# Editorial

Dear Readers,

Welcome to the May issue of Gulf Extrusions Magazine, where we bring you highlights on one of our projects in UAE, innovative product, our engagement at the Aluminium conference in Pakistan and our commitment to employee well-being.

In the heart of Dibba Al Fujairah, Gulf Extrusions played a pivotal role in the iconic Al Sharq Hospital, showcasing our expertise in aluminum innovation.

Within this edition, Gulf Extrusions introduces "Curtain Wall 36", a cutting-edge advancement in building solutions that blend stunning aesthetics with unparalleled functionality to revolutionize architectural integration.

In the realm of architectural advancements, Gulf Extrusions organized the Aluminium and Glazing Facades Conference held in Lahore on Thursday, 23rd May 2024.

This exclusive event provided a platform to showcase our company's futuristic aluminum designs and systems, inspiring architects and developers to push the boundaries of what is possible in the architectural sector. .

At Gulf Extrusions, we prioritize employee comfort and efficiency, and in Abu Dhabi, we've enhanced these by transferring our employees to the Al Aryam Camp, closer to GEX 2.

In May, Gulf Extrusions launched the collaborative Smart Clinic initiative with Aster, prioritizing employee health. We also conducted a mock drill for safety preparedness.

Gulf Extrusions continues to push boundaries, delivering exceptional results and setting new standards in the aluminum industry.

# Al Sharq Hospital: A Landmark Project Showcasing Gulf Extrusions' Aluminum Innovation and Expertise

## **Al Sharq Hospital**

Gulf Extrusions completed the prestigious Al Sharq Hospital, a breathtaking showcase of architectural excellence and the unrivalled aluminum expertise of Gulf Extrusions.

**Project Name:** Al Sharq Hospital

**Consultant:** DRU

**Contractor:** Fujairah National Contracting Group

**Sub Contractor:** Fugseng Construction LLC

**Location:** Dibba Al Fujairah

**Extrusions Supplied By:** Gulf Extrusions Co LLC

**Product Name:** Curtain wall 50.

By leveraging Gulf Extrusions' expertise and high-quality extrusion products, the Big curtain wall at Al Sharq Hospital sets a new standard in innovative design and showcases the integration of aluminium extrusions in large-scale architectural ventures.

## Curtain Wall-36

The new edition CW-36 is a cost-effective curtain wall system which ideally combines modern aesthetics and high performance.

The minimal design offering reduced sightline, compared to other typical curtain Wall systems, only 36mm, the system's sleek design offers wide glazing areas, more natural light and enhanced comfort level.

**CW - 36**

- ✓ Available in 4 depth sizes: 100, 120, 150, 190
- ✓ Multi-structural grid ,conventional curtain wall passing through the two-way horizontal capping curtain wall to the four-way structural curtain wall systems .

For inquiries and orders, we invite you to connect with us at [sales@gulfex.com](mailto:sales@gulfex.com)

## Gulf Extrusions Engages with Industry Leaders in Pakistan Lahore Meetings Highlight Aluminium Solutions

**Gulf Extrusions team visited Lahore, Pakistan from 20 to 25 May, engaging in successful projects' site visits and fruitful meetings with interested companies in the architectural sector regarding our innovative Aluminium solutions.**

Our team held fruitful meetings with the management team of

our fabricator, Defence Aluminium and Glass, in Lahore, Pakistan.

The visit offered Pakistani companies an opportunity to explore Gulf Extrusions' latest trends, innovations, and advanced technologies in the aluminum industry.

The team also had discussions about the opportunities to expand our presence in the Pakistani market and explore potential collaboration on more projects.

# Gulf Extrusions Showcases Futuristic Aluminium Designs and Systems for the Architectural Sector at an Exclusive Event in Lahore, Pakistan

**Gulf Extrusions, the UAE-based Aluminium extrusion company and the Middle East's most advanced manufacturing facility, in collaboration with its authorized fabricator Defense Aluminium, organized and hosted the Aluminium Glazing and Façades Conference on Thursday, May 23, 2024, at Defence Raya Golf & Country Club in Lahore, Pakistan.**

The conference provided a platform for architects, fabricators, companies' owners, investors, industry professionals, and key stakeholders to witness the future of architectural evolutions.

## **Unveiling Latest Aluminium Designs**

During the conference, Gulf Extrusions' industry experts featured presentations, life demo of top-notch Aluminium profiles and shared valuable insights into the latest trends, best practices, and sustainability aspects of aluminium systems in architecture.

Participants had the opportunity to gain a deeper understanding of the benefits and advantages of incorporating Gulf Extrusions' advanced solutions into their projects.

"We are pleased to have had the opportunity to showcase our futuristic aluminium designs and systems at this exclusive event in Lahore" said Sherif Tageldin, Gulf Extrusions Regional Sales Manager.

"Our commitment to pushing the boundaries of innovation in the architectural sector is reflected in the exceptional range of products we presented. We believe these solutions will revolutionize the industry, providing architects and professionals with the systems they need to create stunning, sustainable, and functional structures."

### **Meeting Pakistan's Growing Aluminium Demand**

Gulf Extrusions has identified Pakistan as a key market due to its ever-increasing demand for aluminium extrusions.

Our focus is on the construction sector, architectural industries, as well as automotive and transportation, and we are seeing tremendous participation in the Pakistani market for state-of-the-art aluminium products.

The modern construction, automotive, aviation, energy, and other industries would be impossible without aluminium. In addition, aluminium has become a symbol of progress: all cutting edge devices and vehicles are made from aluminium.

Our most advanced aluminium machining process allows us to produce aluminium structures and profiles for projects to the highest quality standards.

### **Revolutionizing Architecture with Innovative Systems**

As in pavilions, convention centers and modern buildings, Aluminium is widely used to build large-scale structures with non-standard shapes and customized designs such as schools, universities, stadiums, covered pools and other sports facilities.

Aluminium profiles and sections extruded by Gulf Extrusions are used most frequently in civil engineering, being processed into ceiling, windows, doors, stairs, wall panels, roof sheets and many more uses.

Sherif Tageldin, Gulf Extrusions Regional Sales Manager said “Gulf Extrusions have already contributed its high-quality aluminium products to stunning luxury villas and buildings in Pakistan, utilizing modern systems and materials for their installation.”

“The market here is big and mature, which we believe will provide both sustainability and long-term prospects. Architects, fabricators, investors, consultants, and projects owners all over Pakistan are building mega projects using modern designs and we are ready to meet the growing demand of the aluminium profiles and systems that improve the performance of the buildings while adding a trendy look to it.”

The conference concluded with a networking session, allowing attendees to engage in meaningful conversations, expand their professional networks, while further discussing the showcased designs and systems.

We extend our thanks to the organizing team for their efforts and to everyone who attended and contributed to the success of the conference.

## Enhancing Employee Comfort and Efficiency: Gulf Extrusions Abu Dhabi Transfers Employees to Al Aryam Camp

**As part of our commitment to employee comfort and operational efficiency, our GEX Abu Dhabi employees have been transferred from Al Dhafrah camp to Al Aryam camp in KEZAD, Sunday, May 19th, 2024.**

“ This move is part of Gulf Extrusions' commitment to improving the overall work experience and quality of life for its employees. ”

The new Al Aryam camp offers a strategic advantage by being situated in close proximity to GEX 2.

This proximity will significantly reduce travel time for our staff, allowing them to enjoy a better work-life balance.

The camp also boasts modern amenities and facilities, ensuring a comfortable and conducive living environment for our employees.

"We are always looking for ways to better support our staff and make their daily routines more efficient," said Gulf Extrusions Management. "The relocation to Al Aryam camp is just one example of how we prioritize the needs of our employees to ensure their comfort and satisfaction."

Gulf Extrusions values the contributions of all its employees and will continue to explore opportunities to enhance their work-life balance.

## Prioritizing Employee Health and Wellness - Gulf Extrusions Introduces Smart Clinic

As part of our commitment to employee health & well-being, Gulf Extrusions presents a collaborative initiative with Smart Clinic Aster Medical, hosting Smart Clinic visits on the 2nd & 4th weeks of every month.

The first Smart Clinic visit, held on Thursday, May 30th, 2024, in the Clinic Room from 8:00 AM to 3:00 PM.

Instead of visiting hospitals and clinics, doctors & nurses will come directly to our premises. This innovative initiative aims to save valuable time, particularly for individuals requiring chronic medications.

As part of the Smart Clinic campaign, our employees were offered a comprehensive array of complimentary health screenings, encompassing blood pressure and blood sugar level tests, height and weight measurements, assessments for diabetes, hypertension, & hypotension, on-site blood sampling, as well as consultations with doctors and medical professionals.

With these employee health and wellbeing campaigns, Gulf Extrusions demonstrates its unwavering commitment to fostering a healthy and thriving team.

## GULFEX CONDUCTS MOCK DRILL TO ENHANCE EMPLOYEE'S SAFETY IN THE WORKPLACE

As a proactive measure towards ensuring the safety and preparedness of its workforce, Gulfex conducted a well-orchestrated mock drill on 22nd of May 2024 involving its entire employees and visitors present in the building at the time, to assess the preparedness levels of our employees and response teams in case of emergency.

During the drill, employees were given the opportunity to practice emergency procedures in a simulated but safe environment, familiarize themselves with the location of exits, the sound of the emergency alarm and location of the assembly point.

The drill went on perfectly and the response time were upon estimated timelines with everyone taking up their respective positions at the assembly point.

We are committed to continually promoting safety, delivering harm reduction targets, increasing worker involvement and creating a healthier and safer workplace.
