Editorial

Dear Readers,

Welcome to the October edition of Gulf Extrusions magazine, where we bring you a collection of business topics and activities highlights showcasing remarkable project, innovative product, employees engagement initiatives, and our shared commitment to employee health and well-being, excellence and progress.

Gulf Extrusions supplied the high-quality aluminum “Curtain Wall 50” System for the Stonehenge 1 project, demonstrating our ability to deliver precision-engineered façade solutions that meet the highest architectural and performance standards.

The Curtain Wall 50 system continues to stand as a trusted choice for developers seeking strength, durability, and aesthetic excellence in modern construction.

We also conducted an intensive IATF 16949 Core Tools Training in collaboration with Nathan & Nathan Global Inc., empowering our teams in both Dubai and Abu Dhabi with advanced knowledge of APQP, PPAP, FMEA, Control Plan, MSA, and SPC – strengthening our quality systems and automotive standards compliance.

In our project spotlight, we revisit the Dubai Frame, a landmark that stands as

a remarkable example of design and engineering – crafted with Gulf Extrusions excellence and built upon the strength of our aluminum profiles that continue to define iconic architecture.

October also marks a month of employee wellness and health initiatives. Gulf Extrusions launched a comprehensive Health Awareness Campaign aimed at motivating employees to embrace healthier lifestyle habits and prioritize their well-being.

In alignment with global efforts, Gulf Extrusions also marked Breast Cancer Awareness Month through an informative and inspiring session focused on early detection and preventive care.

Adding to the spirit of engagement, GulfEx kicked off its internal fitness challenge, featuring a series of sports and wellness activities designed to promote teamwork, energy, and a culture of active living across all departments.

We hope you enjoy this issue, which captures not only our projects and achievements but also our continuous commitment to excellence, innovation, and the well-being of our people.

Happy reading!

Gulf Extrusions supplied high-quality aluminum 'Curtain Wall 50' for Stonehedge 1.

Project	» Stonehenge 1.
Client	» SEGREX.
Consultant	» Fedral Engineering Consulatnt.
Main Contractor	» Aroma Contracting.
Aluminum Subcontractor	» Ciji Building Metalic Ind.
Aluminum System used	» Gulf Extrusions – Curtain Wall 50.

This system was selected for its performance, and suitability for residential buildings where efficiency and precision are essential.

Stonehedge 1 is a unique project providing residents a rare combination of comfortable internal space and contemporary outdoor living, packaged in modern architecture with sustainability at its core!

Watch the photos and experience the integration of Gulf Extrusions advanced systems, superior performance and remarkable aesthetics of our aluminum solutions.

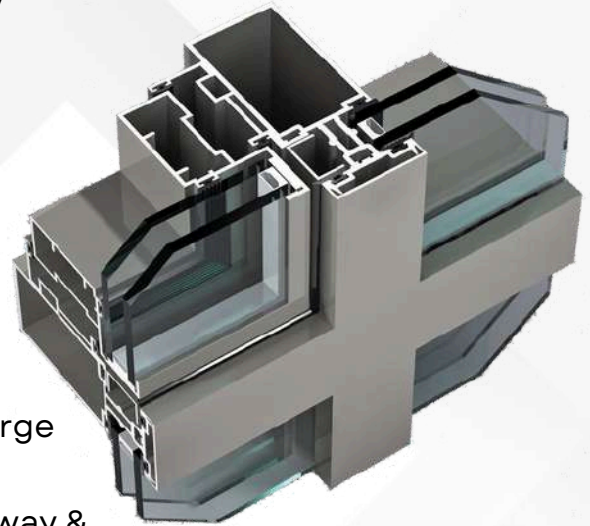

Curtain Wall-50

CW 50 is a unique curtain wall structure that combines multi-structural grid to create various aspects, starting by the conventional curtain wall system passing through the two way horizontal capping curtain wall systems to the four way structural curtain wall systems.

Specifications:

- Features Glass - 6mm to 32mm
- Alloys - 6063 / 6060 / 6061 / 6082
- The System consists of 50mm width
- The System can provide the possibility of large glass panels.
- The System can be used for Two way, Four way & Conventional.
- Casements are Italian Openings.
- EPDM Gasket
- Finishes: Powder Coates / Anodizing

CW 50 MM has proven to be a curtain wall solution perfectly tailored to the Middle East market requirement.

CW - 50

- ✓ *The CW 50 system consists of 50mm width structure components allowing several external appearances.*
- ✓ *With the wide range of profile selection, the system accommodates large glass panels while ensuring the stiffness and rigidity of the curtain wall structure.*

IATF 16949 Core Tools Training Conducted at Gulf Extrusions

Gulf Extrusions hosted an intensive IATF 16949 Core Tools Training, expertly delivered by Mr. C. N. Prasanna Kumar (CNPK) from Nathan & Nathan Global Inc. (NNGI).

The comprehensive sessions were held for our teams across Dubai and Abu Dhabi, reinforcing Gulf Extrusions' ongoing commitment to excellence, quality, and continuous improvement.

Training sessions were held in Dubai on 8, 10, and

15 October 2025, and subsequently in Abu Dhabi on 9, 13, and 14 October 2025, ensuring full participation from teams across both locations.

The training program covered the six key IATF Core Tools – APQP, PPAP, FMEA, Control Plan, MSA, and SPC – combining structured presentations with interactive workshops, practical case studies, and dynamic Q&A discussions.

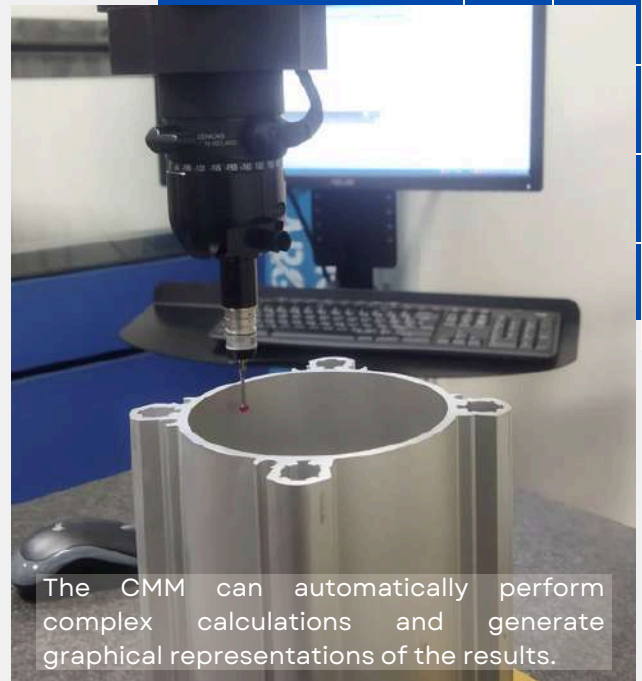

Each session provided participants with deeper insights into quality management systems and practical approaches to process control and product validation within the automotive industry framework.

Advanced Technology For Precision And Quality In Gulf Extrusions

Gulf Extrusions, one of the largest aluminium extrusion plants in the Gulf region, is committed to delivering high-quality products and services to its customers.

To ensure the accuracy and consistency of its extruded aluminium cylinder profiles, Gulf Extrusions uses the Aberlink 3D Mk4 CMM, a state-of-the-art coordinate measuring machine that can perform fast and precise measurements of complex geometries.

The CMM can automatically perform complex calculations and generate graphical representations of the results.

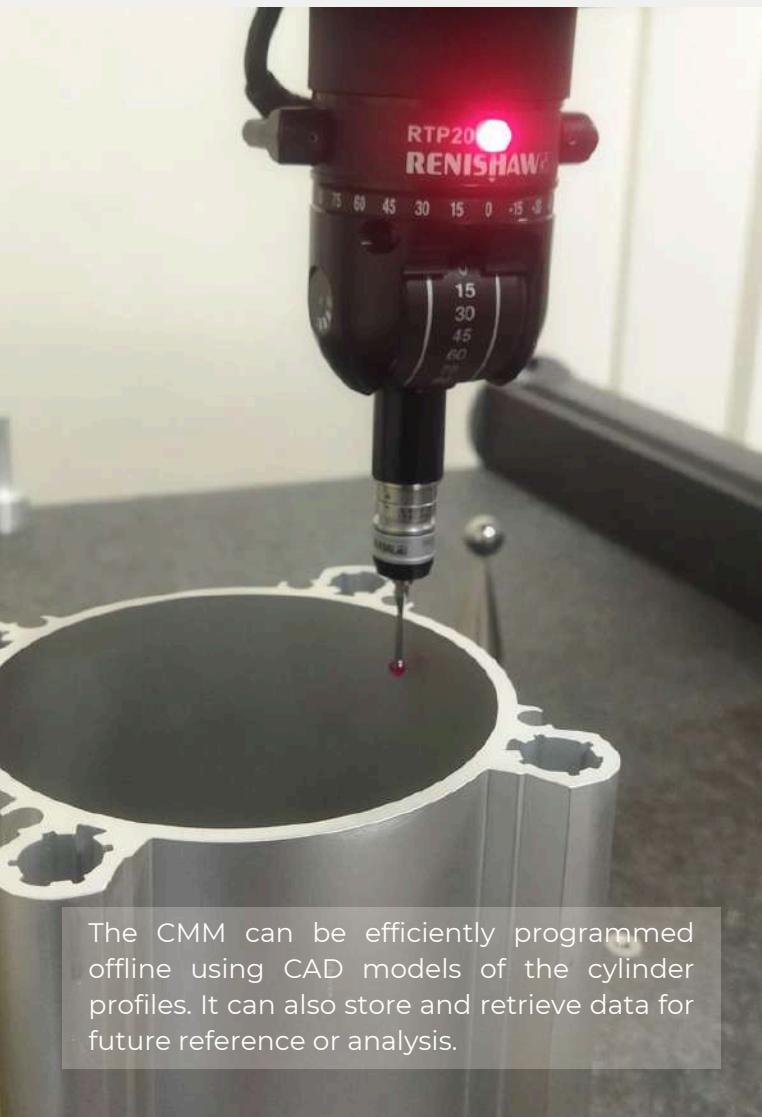

The Coordinate Measuring Machine (CMM) is a highly versatile and user-friendly device capable of operating in both manual and Computer Numerical Control (CNC) modes.

Equipped with a sensitive touch probe, the machine is capable of accurately capturing data points on the surface of cylinder profiles. In conjunction with cutting-edge software, the collected data can be analyzed and compiled into comprehensive reports, showcasing the machine's robust capabilities.

The software, Aberlink 3D, is widely considered to be the most easy-to-use measurement software in the industry, as it has a graphical user interface that guides the user through the measurement process.

This machine can measure various parameters of the cylinder profiles, such as diameter, length, roundness, straightness, concentricity, and perpendicularity. It can also compare the measured values with the nominal values specified by the customer or the design.

By investing in advanced technology and equipment, Gulf Extrusions aims to enhance its quality standards and customer satisfaction.

The CMM can be efficiently programmed offline using CAD models of the cylinder profiles. It can also store and retrieve data for future reference or analysis.

Our contribution to the Dubai Frame project stands as a remarkable journey that reflects our commitment to quality, precision, and engineering excellence.

Gulf Extrusions played an essential role in delivering advanced aluminum extrusions that shape this landmark's distinctive design.

Gulf Extrusions launches Health Awareness Campaign to motivate employees towards healthier lifestyle habits

With the aim of encouraging our employees to adopt healthy lifestyle, Gulf Extrusions, in cooperation with one of the top multi-specialty family hospitals in the country, Aster Cedars Hospital and Clinic, organized 'Health Awareness Campaign' for employees on 28 October at Gulf Extrusions Dubai.

Through this eventful healthcare campaign focusing on all round employee's wellness and dealing with major health problems, employees at Gulf Extrusions had their weight, blood pressure, BMI, blood sugar and cholesterol levels checked. In addition to free health screening, doctor from Aster Cedars Hospital and Clinic provided free counseling to employees at Gulfex and answered their queries, helping to understand and adopt healthy habits for happier life.

Our comprehensive healthcare campaign addresses a range of health issues, including the increasingly common double threat of diabetes and hypertension, as well as other specific disease patterns.

We also facilitated one-on-one counselling sessions with doctors from Aster Cedars Hospital. They kindly answered queries and provided personalized guidance, empowering our employees to better understand and adopt healthy habits for a happier life.

Gulf Extrusions Marks Breast Cancer Awareness Month with an Inspiring Employee Health Session

In recognition of Breast Cancer Awareness Month – October, Gulf Extrusions organized Breast Cancer Awareness Session on 31 October at its Dubai headquarters, reaffirming its commitment to employee well-being and community health.

“ At Gulf Extrusions, we believe that awareness is the cornerstone of prevention. By organizing initiatives such as this, we aim to create a culture of care, where our employees are informed, supported, and empowered to prioritize their health. ”

The initiative aimed to empower employees with knowledge about breast cancer prevention and early detection, aligning with the global movement to raise awareness and encourage proactive healthcare practices.

The session highlighted the importance of regular screening and early diagnosis, emphasizing how timely medical attention can save lives.

Participants engaged in interactive discussions that covered a range of topics, including the causes, symptoms, and risk factors of breast cancer, as well as recommended screening

methods, lifestyle choices, and self-examination techniques that can contribute to early detection and prevention.

This awareness campaign forms part of Gulf Extrusions’ broader commitment to Corporate Social Responsibility (CSR) and its ongoing wellness programs designed to enhance physical, mental, and emotional health in the workplace.

By empowering our employees with the knowledge, resources, and partnerships necessary for comprehensive healthcare, we strive to safeguard their well-being and nurture a healthier employees.

Gulfex kicks off its fitness challenge with exciting activities

With the aim of encouraging Gulf Extrusions employees to make physical activity part of their everyday lifestyle, Gulf Extrusions has kicked off its Internal Fitness Challenge on November 1, as part of the company's commitment to promote fitness and teamwork among its employees in addition to supporting the Dubai Fitness Challenge initiative.

This year, Gulfex internal fitness challenge includes Football, Basketball, Cricket, and Badminton tournaments.

In addition, our employees had also joined Dubai Fitness Challenge by participating in Dubai Run, Dubai Ride and many more activities.

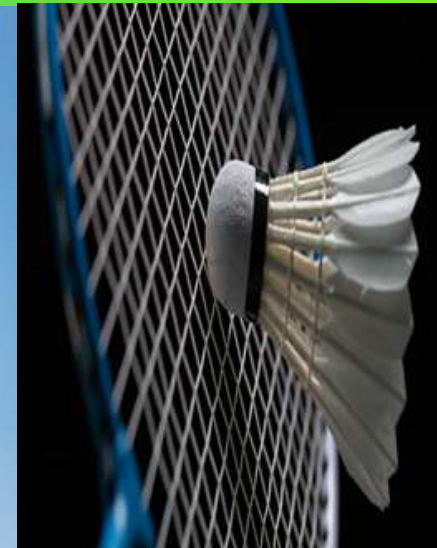

The Dubai Fitness Challenge is a very important part of Gulf Extrusions calendar and was a huge success for the seventh consecutive year.

For all ages, abilities and fitness levels, and with the best weather in Dubai coming up, what better time to kick off your active outdoor lifestyle season!

Put on your sneakers and tighten your shoelaces for a month-long calendar of exciting fitness events and wellness-centric entertainment.

“We're IN for a fitter, happier and more productive workplace with Dubai Fitness Challenge”
